

HOUSTON BOTANIC GARDEN OPENS TO THE PUBLIC

18-09-2020

The Houston Botanic Garden is now open. The first phase of the 132-acre masterplan has transformed an island in the Sims Bayou into an oasis of learning, discovery and horticultural beauty.

We congratulate our visionary client team, and all partners joining us on this fantastic project.

"The intent of the design is to seek balance in all aspects, from planting and soils, through topography and materials—the careful juxtaposition of order and chaos that is at the heart of enduring gardens," - Donna Bridgeman-Rossi, PLA, director of implementation, West 8 NY.

The Houston Botanic Garden will welcome Houstonians from all walks of life. West 8's Master Plan sets the framework to support the garden's shared values of sustainability and diversity, uniting the site into a coherent "only-in-Houston" garden experience.
