

MAGIC FOREST IN SALON DE PINOS, MADRID RIO

25-01-2010

The Salon de Pinos, one of the 47 projects of West 8+MRIO's Madrid RIO project, now features a magic forest of Robinia trees with different sorts of playground equipment in it. For every age group West 8 designed a range of balancing, sliding and swinging objects, also suitable for disabled children. For the production of the objects, West 8 worked closely together with Richter Spielgeräte.
