

NEWS IN PICTURES - INTRODUCING A NEW CHAPTER OF WEST8.COM

07-02-2014

We are excited to launch the 'News in Pictures' section of our website. News in Pictures will keep you up to date with West 8's new and current work in a visual format. News in pictures is a work in progress, it will document the latest projects, current competitions, and construction updates. It will complement our more detailed news items by offering you a glimpse of what's on our desks.

We aim to bring you regular visual commentary using images, info-graphics and video posts as a way to share information on West 8's upcoming, ongoing projects or recently completed projects as they grow into their full glory.

This new chapter begins with a brand new documentary of Groene Loper - A2 Maastricht - Green Ribbon of A2 Highway; a link to a fascinating film about the Madrid RIO project in its current mature state; a live web cam link to the public space under construction in front of Rotterdam Centraal station; a 3D animation movie showing the making of The Hills of Governors Island and much much more. Click to go to this '[news in pictures](#)' chapter now and explore.
